

## PR10V

The PR10V is a professional power rail with a unique vertical design, where each of the outlets is positioned vertically as opposed to the traditional horizontal power boards. This is specifically suited to all DEX DJ STANDS floating coffins and free standing DJ stands. This ensures a true hidden cable design, for all equipment, regardless if the particular item uses an AC adaptor. The power rail features ten outlets, a two meter chord and overload protection.

### FEATURES

- » vertical positioning of outlets
